AutoCAD History AutoCAD is the product of a team led by Dean Kilby. In 1981, Kilby became an independent contractor for Digital Equipment Corporation (DEC), where he was asked to develop CAD software for the new Alpha computer. Kilby responded by creating a simple, user-friendly graphics program that could be operated in front of the Alpha. Kilby chose to use the term "AutoCAD" as a marketing term for his product, which would capitalize on the popularity of the term CAD. Kilby's personal history with AutoCAD began in 1980 when he attended a conference at Harvard University with Ray Ozzie. At the conference, Kilby met Jack Topchik, who was planning on opening a business based on CAD software for the PC. Kilby immediately pitched the idea to Topchik, who agreed to form a company to market the first
