Firmware: Here is the list of firmware's available in below tab, just click the firmware or other item to get more details about that firmware.Q: KERNEL_CLASS_ROOT: how do I use it and what is it for? I'm quite new to Linux kernel programming. What is KERNEL_CLASS_ROOT? How do I use it? A: Kernel_class_root is defined in include/linux/kernel.h, it is used to find a class method implementing a function that is defined in a virtual method list of an object of a given class. This virtual method has a signature of type rq_queues*, the pointed object is a Kernel_class_object. The object pointer is here passed to a function as a parameter, the pointer is used to look for method in the same class. If an object has more than one method implementing the same function with a different signature, just need to count the number of pointers to find that function using the method id.

(CNN) On the eve of the most important day of his presidency, President Donald Trump on Tuesday tweeted out a series of critical statements aimed at Attorney General Jeff Sessions. The President's latest diatribe targeted Sessions, a veteran US Senator with a long history of supporting the President, over the alleged deep state conspiracy against him. The President has publicly and privately battled with Sessions, believing his attorney general was not doing enough to reverse the tide against his perceived enemies. The latest salvo, tweeted at 10:46 a.m. ET, concerned the Justice Department's investigation into former national security adviser Michael Flynn. Trump has long made clear his disdain for the former FBI director, accusing him of leaking to the press, lying to the FBI and more. Automatic Just as when I posted my latest piece, "So Long, Dirty Eddie" about the departure of legendary radio DJ Eddie Antar, the comparisons to Jerry Lewis were inevitable. Like Lewis, Eddie Antar left the radio business by his own free will and not by way of a shotgun blast to the face. The difference is that when Jerry shot Eddie, he suffered a fractured skull and lost a leg and a significant amount of time in rehab, was unable to do much if anything, and is a generally lovable character who didn't try to get back on the air. Eddie, on the other hand, was in good health throughout his working life and did not require the same level of physical therapy.

As I wrote on the Inner Radio blog, "The popular media is foolishly likening the dissolution of the legendary radio DJ 'Eddie Antar' with the flamboyant, irreverent Jerry Lewis. But anyone who's been involved in the radio business knows that you could easily extend the comparison to the Hollywood entertainment industry (as those of us who were a part of it have). Any number of legendary stars left the biz by their own free will and this was likely their departure (and exit from) the industry with dignity and grace, not by getting shot in the back of the head with a shotgun. Jerry Lewis was in good health (unlike Eddie), not a wreck (unlike Eddie), and he's been back and back again, though not to the level of the vast majority of people who have truly been a part of the radio business. Can you imagine seeing John Lennon or Neil Young hanging around a radio station before their music was known outside of LA? Stephen King isn't a household name, but he's probably the only novelist who has influenced writers of books for young adults, like Anne McCaffrey. Jimmy Buffett doesn't have a radio show. The list goes on and on, and the only reason that Eddie 3e33713323
