Effects of chronic administration of the aldosterone antagonist spironolactone on impaired baroreflex control of the heart rate in heart failure. To investigate whether the chronic use of spironolactone, a potent aldosterone antagonist, could be beneficial in heart failure, we studied its effects on the baroreflex control of heart rate in 10 patients with severe heart failure and no contraindications to its use. We assessed the baroreflex sensitivity with the sequence method and the influence of aldosterone on this sensitivity. The inotropic response to phenylephrine in anesthetized patients receiving a stable dose of spironol
