What's New in the ChiXPress?

----- ChiXPress is a simple download manager designed to supports FTP and HTTP

protocols. It is designed to be efficient and low-resources consumer. There is currently no plugins, but a clipboard tracker that track urls that are copied into the clipboard. Features -----

----- *

- Support FTP (or HTTP) * Download to any directory * Now with clipboard tracking *
- Supports partial download * The progress of the transfer is shown in the tray * Supports Multi-threading (it uses 2 threads per download) * Now can auto-resume a download * Saving the download list in an xml file. Changelog -----

----- *

- 18-05-2005 * The link downloader now working properly (the link from which the program should download is checked) * Also the "Invalid param:" message is now gone * 12-05-2005 * Some bug fixes * Added the options to choose the time limit of the queue size or the time limit of the downloading * 19-04-2005 * Added a new option to set the default file (which file should be

downloaded if you don't click in a file to download it) * Added the option to set a list of the files to be downloaded (to be used as a queue if you don't want to change the files to download manually) * Added the option to force download the files automatically (if the files to download don't exist, they will be created in the directory you set) * Added the option to resume an interrupted download * 18-04-2005 * Bug fixes * Now the settings are stored in an xml file * 27-03-2005 * The "Save Queue" is now in the main window * 26-03-2005 * Bug fixes * 25-03-2005 * Added the option to save the progress (which can be used to start the download from where you stopped before) * 24-03-2005 * Added the option to change the behaviour of the downloader (for example, when you set to download the file manually it will download the files with a single click) * 13-03-2005 * Bug fixes * Added the option to change the time limit of the queue size * 07-03-2005 * A minor bug fix *

28-02-2005 * Added the option to change the number of threads used to download the files. *

02-02-2005 * Now the list of the downloaded files is shown in the main window * 19-01-2005 *

Now the link downloader is added. * 17-01-2005 *

* Now there is a settings window to modify the behaviour of the downloader * 18-11-2004
