Waste of time 1 By Pemra I'm not impressed at all. It's just a sticker on the desktop with a few weird filters. I know you can change what you want to change, but most of them are not very configurable. It's too big and it's not customizable. Simple and powerful 5 By KEMBUN-ISAWATOMICHI I love this app. A lot of skins to choose from. And a lot of customization options, particularly the time/date. Unconvincing and buggy 1 By ejeop I use an unusual skin to make the windows tray transparent, however I found that this is incompatible with Elmas Note. On the other hand, the app showed up the following error message: "error opening input device"
