A free russian dictionary contains a huge selection of terms from various vocabularies. Just by clicking on the root word, you can access such terms as a city, a region, a category, a state, a person, etc. You can also use the sidebar to browse through the names of the various states, regions, and districts, alphabetically or by popularity. To sort the terms by categories and subcategories, click on the column header on the right. You can search for the term, enter the name in the search box, and then access all the variations of the word and the possible synonyms. To see the definition, click on the corresponding link. Also, you can view the word's part of speech, describe it with an example, and check the source of the word. If you use Google Translate, you will be prompted to perform the search and define the word as you read the translations of different websites.
