Automatically converts strings of source code to hexadecimal, binary or ascii formats... Free Keymacro Description: Automatically converts strings of source code to hexadecimal, binary or ascii formats. Hex2ASCII is a small software utility that automatically converts all strings of source code to a hexadecimal, binary or ASCII format... Manage application updates and user data automatically As you can see, the application comes with a great deal of functionality. For instance, it can convert all strings of source code automatically, whether you need to save them to clipboard or to write them down. Moreover, it can enable you to manage automatic updates, as well as any data that was created while the program was running. All you need to do is to initiate an update, which is then handled automatically. In addition to that, the tool can clean-up the source codes automatically, if you do not want to have them in your clipboard. In addition, it includes a graphical user interface that allows you to add and remove source codes that you want to write down and to add user data. Convert strings of source code to Hexidecimal, binary or ASCII format automatically In fact, Hex2ASCII is a small and easy-to-use application that enables you to convert strings of source code to Hexidecimal, binary or ASCII formats. All you have to do is to add the text you want to convert, specify the conversion type, and let the tool do the rest. Furthermore, it includes a simple and straightforward user interface that is friendly to the eye and completely intuitive to use. As a matter of fact, there is a small window with two panels dedicated to the input and output of the codes. After you have added the source codes you want to convert, you are required to specify the conversion type, and then to click the Convert button. It is important to note that the application does the conversion automatically, while you are typing in the codes. In addition to that, it includes a search feature that enables you to find the codes you have entered previously and to use them, if needed. It is also necessary to specify whether you want to save them to clipboard or to write them down. You can do so by specifying a destination location. In addition, the program can delete the source codes automatically, if you want to clean-up your clipboard. Note that the utility is a freeware, as it is completely open 77a5ca646e
