PcMessenger Crack + Free Registration Code

MailMessenger is an innovative instant messaging program for exchanging messages through an Intranet. It is like instant messaging for your entire office with easy, fast and reliable communication between all your employees. This FREE messaging program works like a true client/server application so you don't need to have a server on your network. You can send and receive messages right from your desktop without using a web browser. MailMessenger does not require you to be connected to the internet in order to send messages. You don't need to have a web browser. Unlike other IM programs, there is no need to install a web server. MailMessenger has a very simple, easy-to-use interface that makes it ideal for new users. It is packed with over 200 customizable messages and other features including a built in free, 30 day trial. A unique ability of MailMessenger is to automatically add new users to your buddy list so you can send instant messages to groups of users. MailMessenger allows you to save messages to a history file and easily print messages, and resumes conversations from the previous time you left. Features: ☐ Supports the.NET framework: it is a Windows application and therefore runs on Windows 95/98/NT/2000/XP/Vista (32 or 64 bit). It doesn't require.NET Framework installation. ☐ No need to install a web server. Just set up your modem and the rest is easy. ☐ Supports multiple users. ☐ Supports hot keys. ☐ Supports Screen Saver Mode. ☐ You can log in through the Internet or through our dedicated system. ☐ Messages can be edited/resend (you can even delete or resend deleted messages). ☐ Users can be added to your buddy list. ☐ Messages can be saved to your history file. ☐ Messages can be printed. ☐ Messages can be copied to your clipboard. ☐ You can send and receive multimedia messages. ☐ You can send multiple files with a single message. ☐ Supports user defined user names (you can even define a custom user name). ☐ Supports environment variables. ☐ Supports time zone. ☐ Supports multiple time zones. ☐ Supports native string data types. ☐ Supports Unicode text. ☐ Supports Rich Text Formatting. ☐ 81e310abbf
