A handy tool that enables you to record keyboard macros. Configure, run, and uninstall macros Fully configurable Enables you to create macros without the need to memorize their names Extremely simple to set up 3 built-in samples and a user-friendly interface Support for Microsoft Windows® 98, 2000, XP, Vista, 7, 8 and 10 Even if you are a newbie, you will be able to configure this program. A built-in search feature helps you find specific information in the program settings KEYMACRO is a simple application for managing your keyboard macros. With a simple interface, you can easily configure your macros and then run them. Once a macro has been created, you can use it with a single key stroke or several. To access and run the macro you need to click on a button. Once the button has been pressed, the application immediately executes the macro for you. Make it possible to use a custom macro keystroke Once the macro has been created, you can also assign a specific keystroke to launch it. To use this function, you will need to install the free and useful Keymapper tool. Keymapper is an indispensable tool for all Windows users that enables you to use customized keystrokes. The program has a simple interface with a large number of predefined keystrokes. After choosing the macro keystroke you want to use, you will be able to set it to automatically launch your macro. There is even an option that allows you to perform your macros in a non-interactive mode. In the non-interactive mode, the program pauses automatically after running the macro. Additionally, the tool enables you to choose what tool should be used to run your macros, be it a batch file, a VBS file, or a shortcut file. Keymapper is a program for managing your keyboard macros. With a simple interface and a large number of predefined keystrokes, this application is a great tool for every Windows user. Keymapper tool description: How to install: You can install the Keymapper tool on your computer with the following simple steps: 1. Open the download link and save the file Keymapper.exe to your desktop. 2. Open Windows Explorer and right-click on the file that has been saved. 3. Choose "Open With" and select "Default" or "Custom" or " 81e310abbf

Sticky Notes is a small, easy to use, free-form to-do list manager which allows you to arrange tasks in a card style list, note book, or alphabetical index. You can add tasks by typing them in or importing them from your clipboard. You can also import to-do lists from other applications, from a local text file, or from a web page. You can set reminders for your tasks, have them stored in your task list, or even export your tasks to a text file. The program is protected by a customizable password and you can lock and unlock your task list. You can edit a task from the list. With a few keystrokes you can copy the entire task to the clipboard and you can paste it into another task or a new document. Main functionality: You have all the tools you need to create and manage your task list. You have a tool for creating tasks, exporting them to a text file, and you can even import tasks from other applications. You can also specify which task to open each time you open your task list. A task manager is provided so you can quickly see how much time each task has spent on your to-do list. You have a search feature for finding tasks. There are three views for your task list. You can have a task list with cards, notes, or an alphabetical index. You can have your tasks arranged in one column, or you can have a list of tasks with blank lines between them. You can also have your tasks exported to a text file. If you have a task in your task list that you don't want to see anymore, you can mark it for deletion. Other features: You can import tasks from a local text file, from a web page, or from the clipboard. You can also lock and unlock your task list to prevent other people from seeing what you have on your task list. If you prefer, you can encrypt your tasks with a password to prevent others from copying them from your task list. You can search for tasks in the entire task list or limit your search to a single category. You can arrange tasks by date, due date, or priority. You can specify which task to open each time you open your task list. Last few words: Sticky Notes is a very flexible program. You have all the tools you need for creating and managing your to-do lists. Description: Receipts is a simple application for users who must keep track of their receipts.

What's New in the?
