AutoCAD Elements (formerly AutoCAD LT) is a drawing automation product for AutoCAD that allows the automation of drawing creation and editing tasks. ACADengine, developed by London based Accessibility Technology Limited, is a C++ class library that extends AutoCAD drawing tools to make them accessible to the blind and visually impaired. The technology is based on using the Macromedia Flash Player to interact with a plugin that is embedded in an AutoCAD drawing and has been used by the NAB Center for the Study of Commercial Impairments to design the Victoria and Albert Museum in London. Exports and imports With recent advances in CAD and graphics technology, CAD files and images can be exported and imported to other CAD applications.
