KEYMACRO is an easy-to-use tool for keyboard automation. KEYMACRO gives you all the functions and capabilities of the Mac OS X Keyboard Controller, but it is completely FREE. It can even be used to switch different keyboard layouts and to assign special keys to commands. What's new in v2.4.4: * Minor bug fix release. * "Hide others" option now appears in Main menu. * Default skin looks better on some systems. * The "Enable" checkbox now works. * Minor bug fixes. I have been playing with Apple's KeyMacro for about a year now and have been a very satisfied user. I was quite surprised when I discovered I could port it to Mac OS X 10.6 and I have. KeyMacro is free, open source software, and it does indeed work on Mac OS X 10.6! It's a full featured keyboard automation app that you can run on your Mac, a \$10 download from Apple's Website. I've been using it for a while now and I've found it to be an incredibly powerful tool for keyboard shortcuts. The interface is intuitive and extremely customizable. It features some of the most useful keyboard command features I've seen, including: * Button remapping * Automated shortcuts * Repeatable shortcuts * Shift-Click or modifier keys * Keyboard layout switching * Text replacement KeyMacro can be used in the Mac OS X Dock, in your window titles and more. KeyMacro also includes an extensive set of keyboard shortcuts. It has customizable shortcuts for windows, full screen apps, system apps, and your own menus. You can create your own keyboard shortcuts and assign them to any command you wish. KeyMacro supports both the Mac OS X and Windows keyboards. It can be used with any application that supports shortcuts, and it works in other OSes as well, including Linux and Microsoft Windows. It's a very unique product and I think you'll find it to be a useful tool for keyboard automation. KeyMacro is FREE for any use and distribution. It's a very powerful tool for Mac OS X users. KEYMACRO v2.4.4 Version 2.4.4 of the application has been released today. This is a bug fix release, and no new features have been added. Here is what has been fixed: * A crash that would occur if a block of text was deleted 1d6a3396d6
